

### Main features

- Profibus node number programmer for MK4-P and IK4-P transducers.
- Powered from 10-32 VDC line (also powers the sensor), optional wall adapter.
- Simple onboard user interface

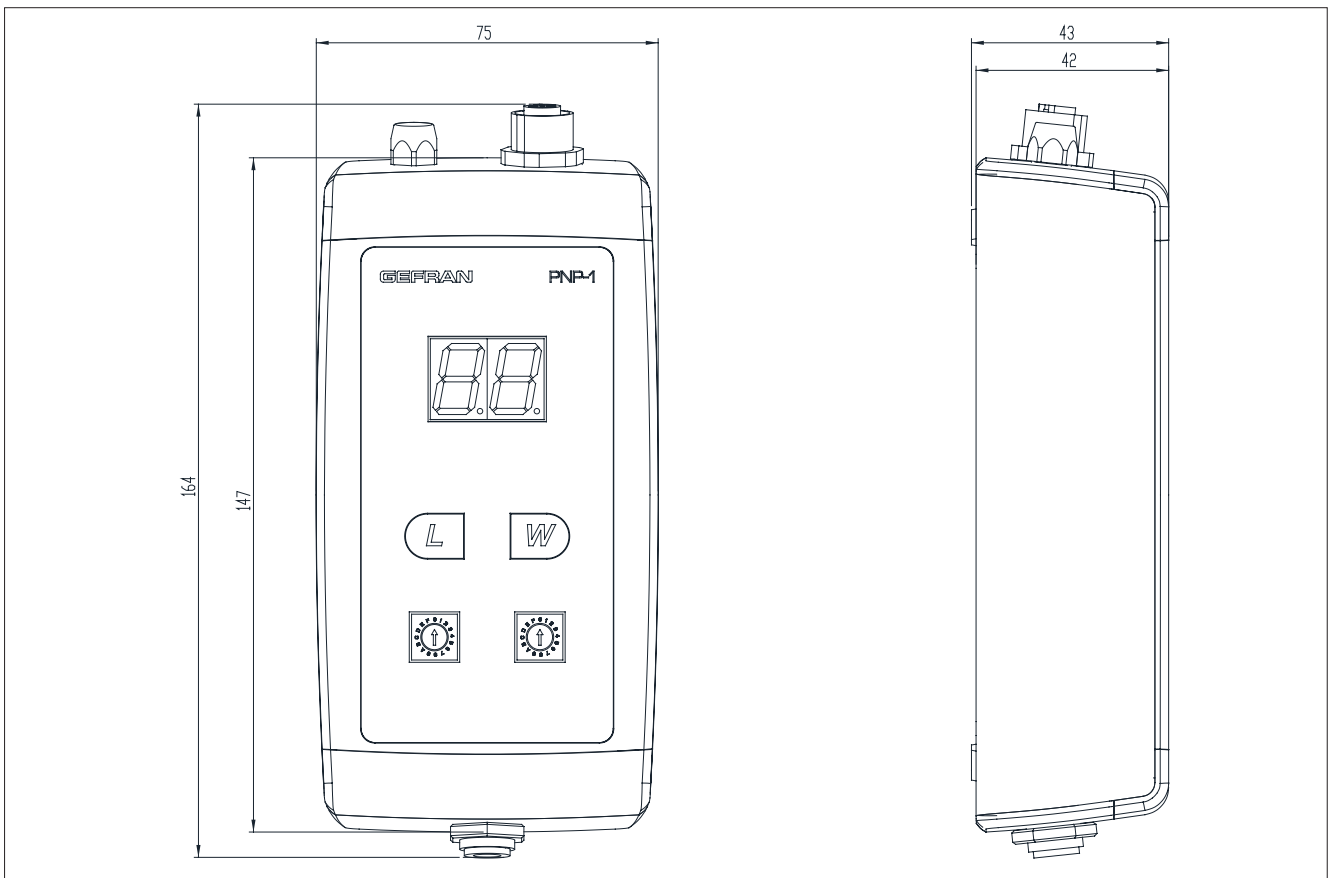

The Profibus node number programmer sets the node number for a series MK4-P / IK4-P sensor by connecting the programmer directly to the sensor you want.

Therefore, a Class 2 Master is no longer required for this operation.

### TECHNICAL DATA

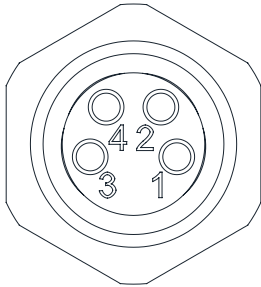

Power supply	10-32Vdc (wall adapter supplied as option)
Max power supply ripple	1Vpp
Current draw	2 W
Polarity inversion protection	YES
Overvoltage protection	YES
Self-resetting internal fuse	YES
Work temperature	- 20....+50°C
Storage temperature	- 20....+50°C
